

# FD-1010 COLD COMPACTION DENSIFIER

Avangard Innovative provides a complete line of cold compaction foam densifiers. Designed as an alternate solution to melt densifiers which produce block without heat. These compressed blocks are a marketable recycling product ready for shipment. We offer several makes and models in varying sizes and production capacities.

## DENSIFIES

Polystyrene (EPS)

## FEATURES

Processes up to 45 Lbs. /Hour of Loose EPS Foam  
Reduces Foam Volume by Approximately 60 to 1

## OPTIONS

Silo / Bag and Frame  
Foam Shredder

## TECHNICAL SPECIFICATIONS

> Power kW	1.5 kW
> Voltage (V)	110V/220V single-phase
> Weight (lbs./kg)	683 lbs. (310 kg)
> Max. EPS Capacity (lbs./kg per hour)	45 lbs./hour (20 kg)
> Feed Opening (W x H in/mm)	23" x 22" (590 x 550 mm)
> Footprint (D x W x H in/mm)	33" x 75" x 59" (850 x 1900 x 1500 mm)
