

FD-25

Foam Densifier

FEATURES

- ◆ Densifies Polystyrene (EPS), Polyethylene (EPE) & Polypropylene (EPP)
- ◆ Processes Up to 300 lbs./ Hour of Loose EPS Foam
- ◆ Reduces Foam Volume by Approximately 90 to 1

BENEFITS

- ◆ Reduces Waste Hauling and Landfill Costs
- ◆ Generates Revenue by Creating a Marketable Product for Recycling
- ◆ Loaner Program

OPTIONS

- ◆ Exhaust Vent Kit
- ◆ Photo Eye
- ◆ Molds

We provide a complete line of foam densifiers to help customers in the collection management of scrap foam material. Our machines process foam by densifying it into a block form which becomes a marketable recycling product. Each machine can densify three main types of foam: polystyrene (EPS), polyethylene (EPE), and polypropylene (EPP).

We offer several makes and models in varying size and production capacity

Model & Version	FD-25 V13
Power	21.5 HP (16 kW)
Voltage	230V/460V three-phase
Weight	1600 lbs. (726 kg)
Maximum Capacity (EPS)	300 lbs./hour (136 kg/hour)
Feed Opening (W x H)	25" x 16" (635 x 406 mm)
Foot Print (D x W x H)	58" x 52" x 72" (1473 x 1321 x 1829 mm)
